CAREER PROFILE

Results-driven Java Developer with 8 years of hands-on experience in implementing and delivering high-quality software solutions. Adept at collaborating with cross-functional teams to deliver high-quality solutions on time and within budget. Committed to staying current with industry trends and continuously enhancing technical skills

EXPERIENCES

Senior Software Engineer
Oct 2019 - Present

Tarya Fintech Bulgaria

Responsibilities:

- Collaborated with cross-functional teams to analyze and define product requirements, ensuring alignment with business goals.
- Conducted regular code reviews, mentored junior developers, and enforced coding standards to ensure high-quality codebase.
- Debugging and resolving issues, ensuring the integrity of the overall system
- Worked closely with quality assurance teams to identify and address software defects
- Collaborated on the design and implementation of a Risk Assessment Module. Implemented a flexible and dynamic system, capable of executing various models based on predefined conditions. This design approach enhanced adaptability to changing risk evaluation requirements.
- Contributed to the development of a loan origination platform, collaborated with product managers to gather requirements and translate them into technical specifications

Technical Skills:

- Java 8, Java 11
- Spring Boot
- MongoDB, MySQL
- Kafka, RabbitMQ
- Maven, Gradle
- Docker containers, Kubernetes (Argo)
- Git, Bitbucket
- Jira
- Microservices
- AWS
- CI/CD pipelines with Jenkins for automated integration, deployment, and continuous delivery

Full Stack Developer
March 2016 - Oct 2019

Clouway Ltd, Veliko Tarnovo

Responsibilities:

- Performed analysis of customer requirements, designing, developing, and testing software solutions to effectively meet their needs.
- Conducted regular code reviews, providing feedback to team members to maintain high code quality.
- Worked with Java and SparkJava to develop robust backend services, ensuring real-time data synchronization with Firestore.
- Collaborated closely with frontend developers to define data models and ensure consistency in data structures for efficient offline operation.
- Implemented push notification using Firebase
- Implemented scalable and responsive front-end components using React and Redux, ensuring a smooth user experience.
- Worked closely with more experienced team members to gather insights and knowledge in designing and implementing high scalability and robust systems

Technical Skills:

- Java, Kotlin
- SparkJava, ReactJS, Angular 1.5
- Google Cloud Platform(GAE, GKE, Google Pub/Sub, BigQuery, Firestore, Firebase)
- Gradle
- Git, Github
- Microservices
- Event Driven Design
- TDD

Trainee at Clouway Ltd
Sept 2015 - March 2016

Clouway Ltd, Veliko Tarnovo

- Learned frontend and backend development with Angular and Java.
- Gained additional knowledge about databases.
- Learned testing & test automation.
- Learned TDD
- Learned build tools & build automation like Maven and Gradle.
- Learned about Version Control - Git
- Learned how the code-review process works using Github PR.
- Learned how to work in a small team using Scrum methodology.
